- Problem Statement Title- AI-Based Internship Recommendation Engine for PM Internship Scheme
- Theme- Smart Education
- PS Category- Software
- Team ID- 73201
- Team Name- The PIXELS

CareerNest

Smart PM Internship Recommendation App

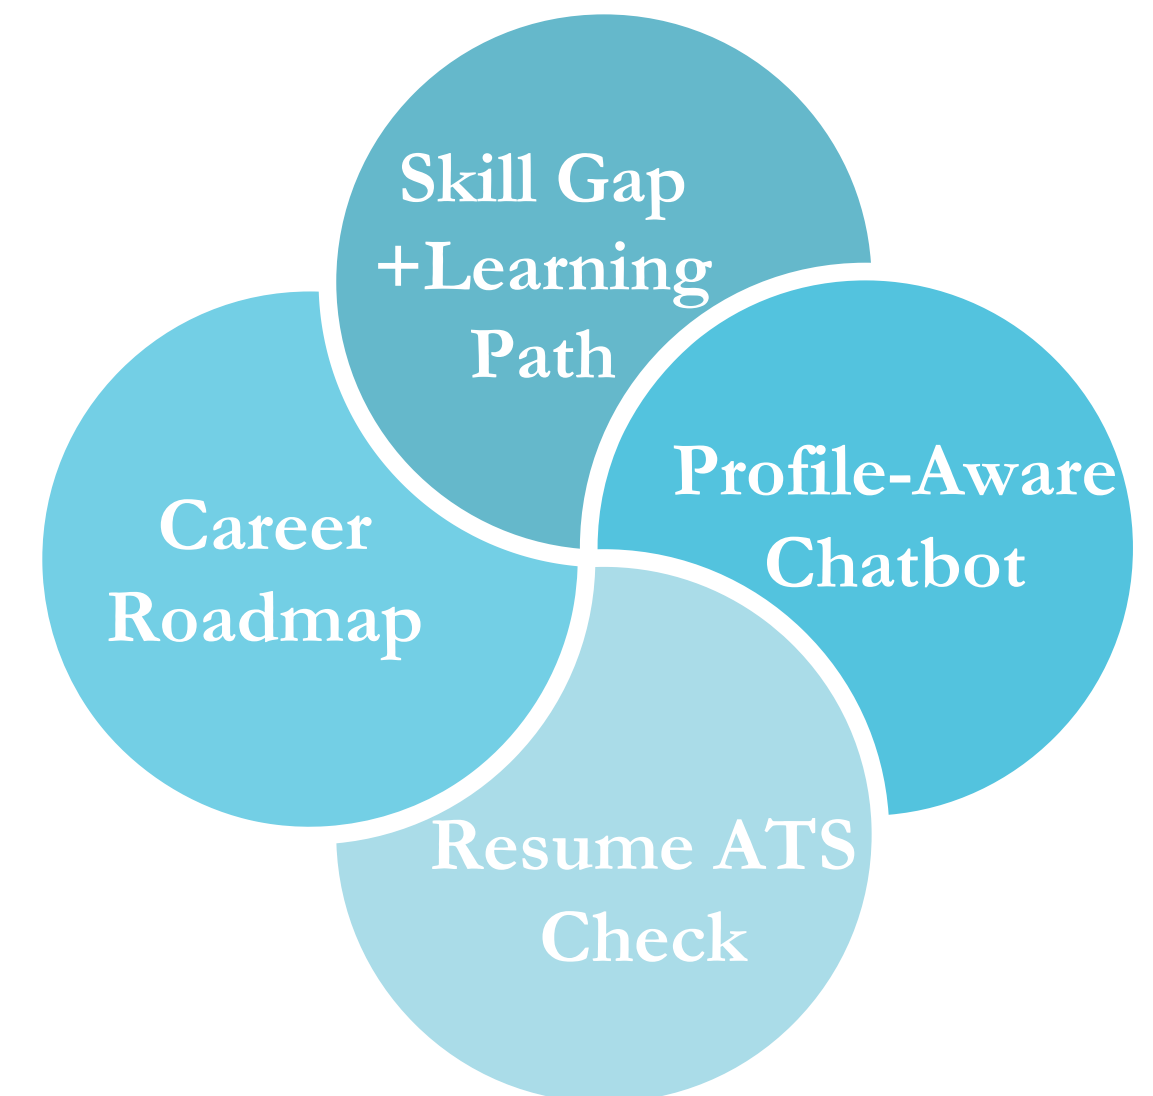

Core Concept:

- AI-driven recommendation system for PM Internships
- Mobile-first design with regional languages and intuitive visuals for easy use by all.
- Suggests best-fit internships based on user profile/skills
- Matches internships with user's skills, education, interests, and location preferences
- Enriched with career guidance and skill improvement pathways

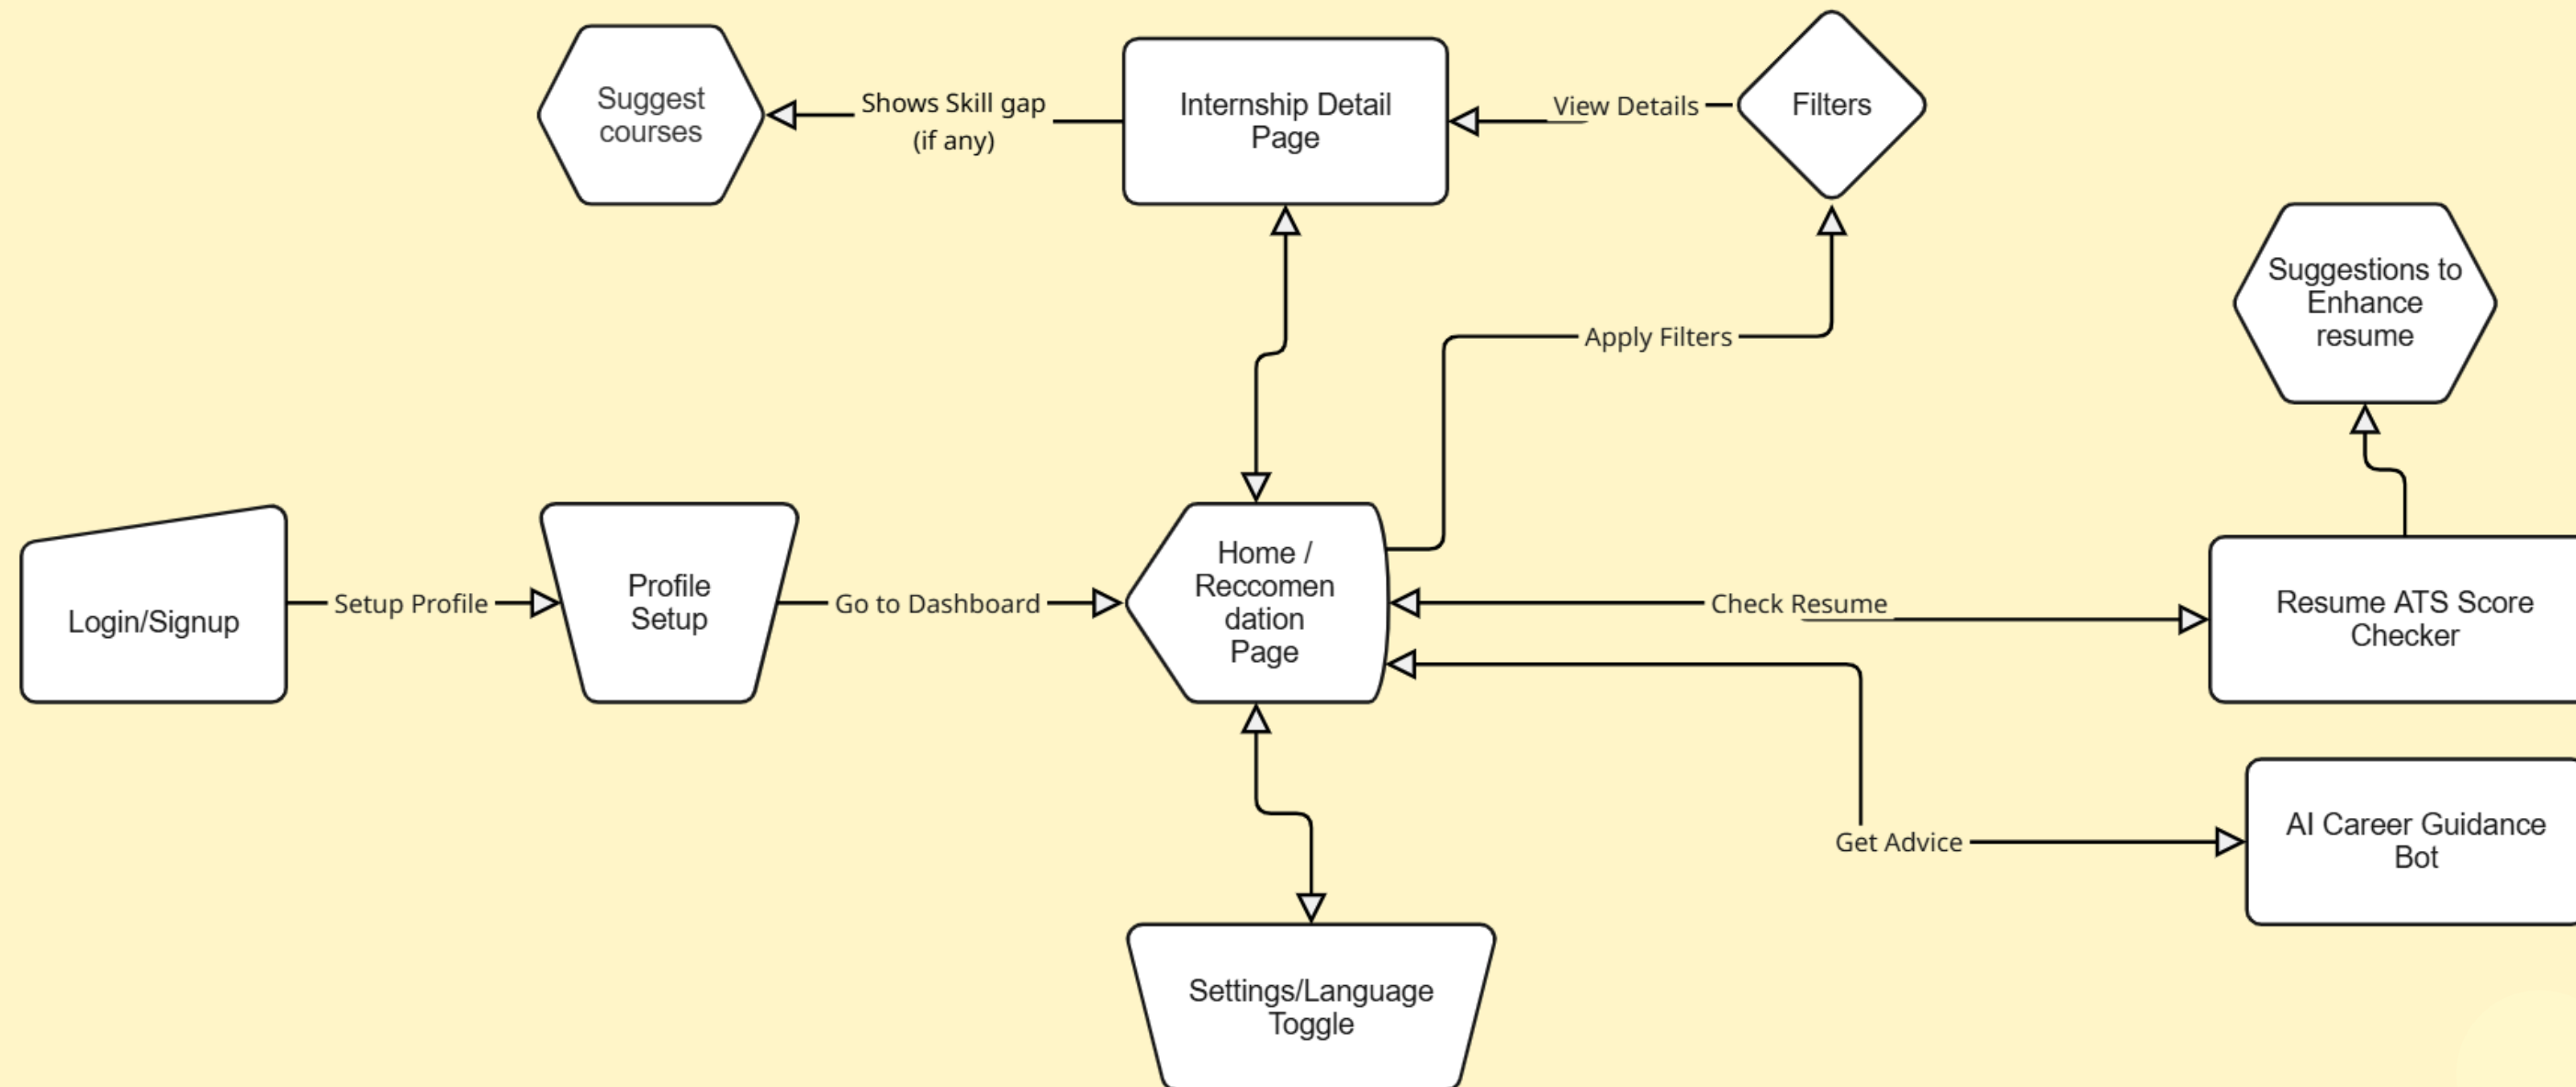

Why This Matters:

- Current portal shows too many options → students get confused
- Many apply for mismatched internships → low success rate
- Rural/first-gen students lack awareness of required skills and career growth
- Students often don't know if their resume is ATS-friendly → leads to rejection

Distinctive Features:

Methodology:

Tech Stack:

Feasibility

- Uses existing government data (internships + user profiles)
- Lightweight, scalable cloud deployment

Viability

- Ratings & feedback from other students
- Low digital literacy friendly
- Students get 3–5 best-fit internships instead of being overwhelmed

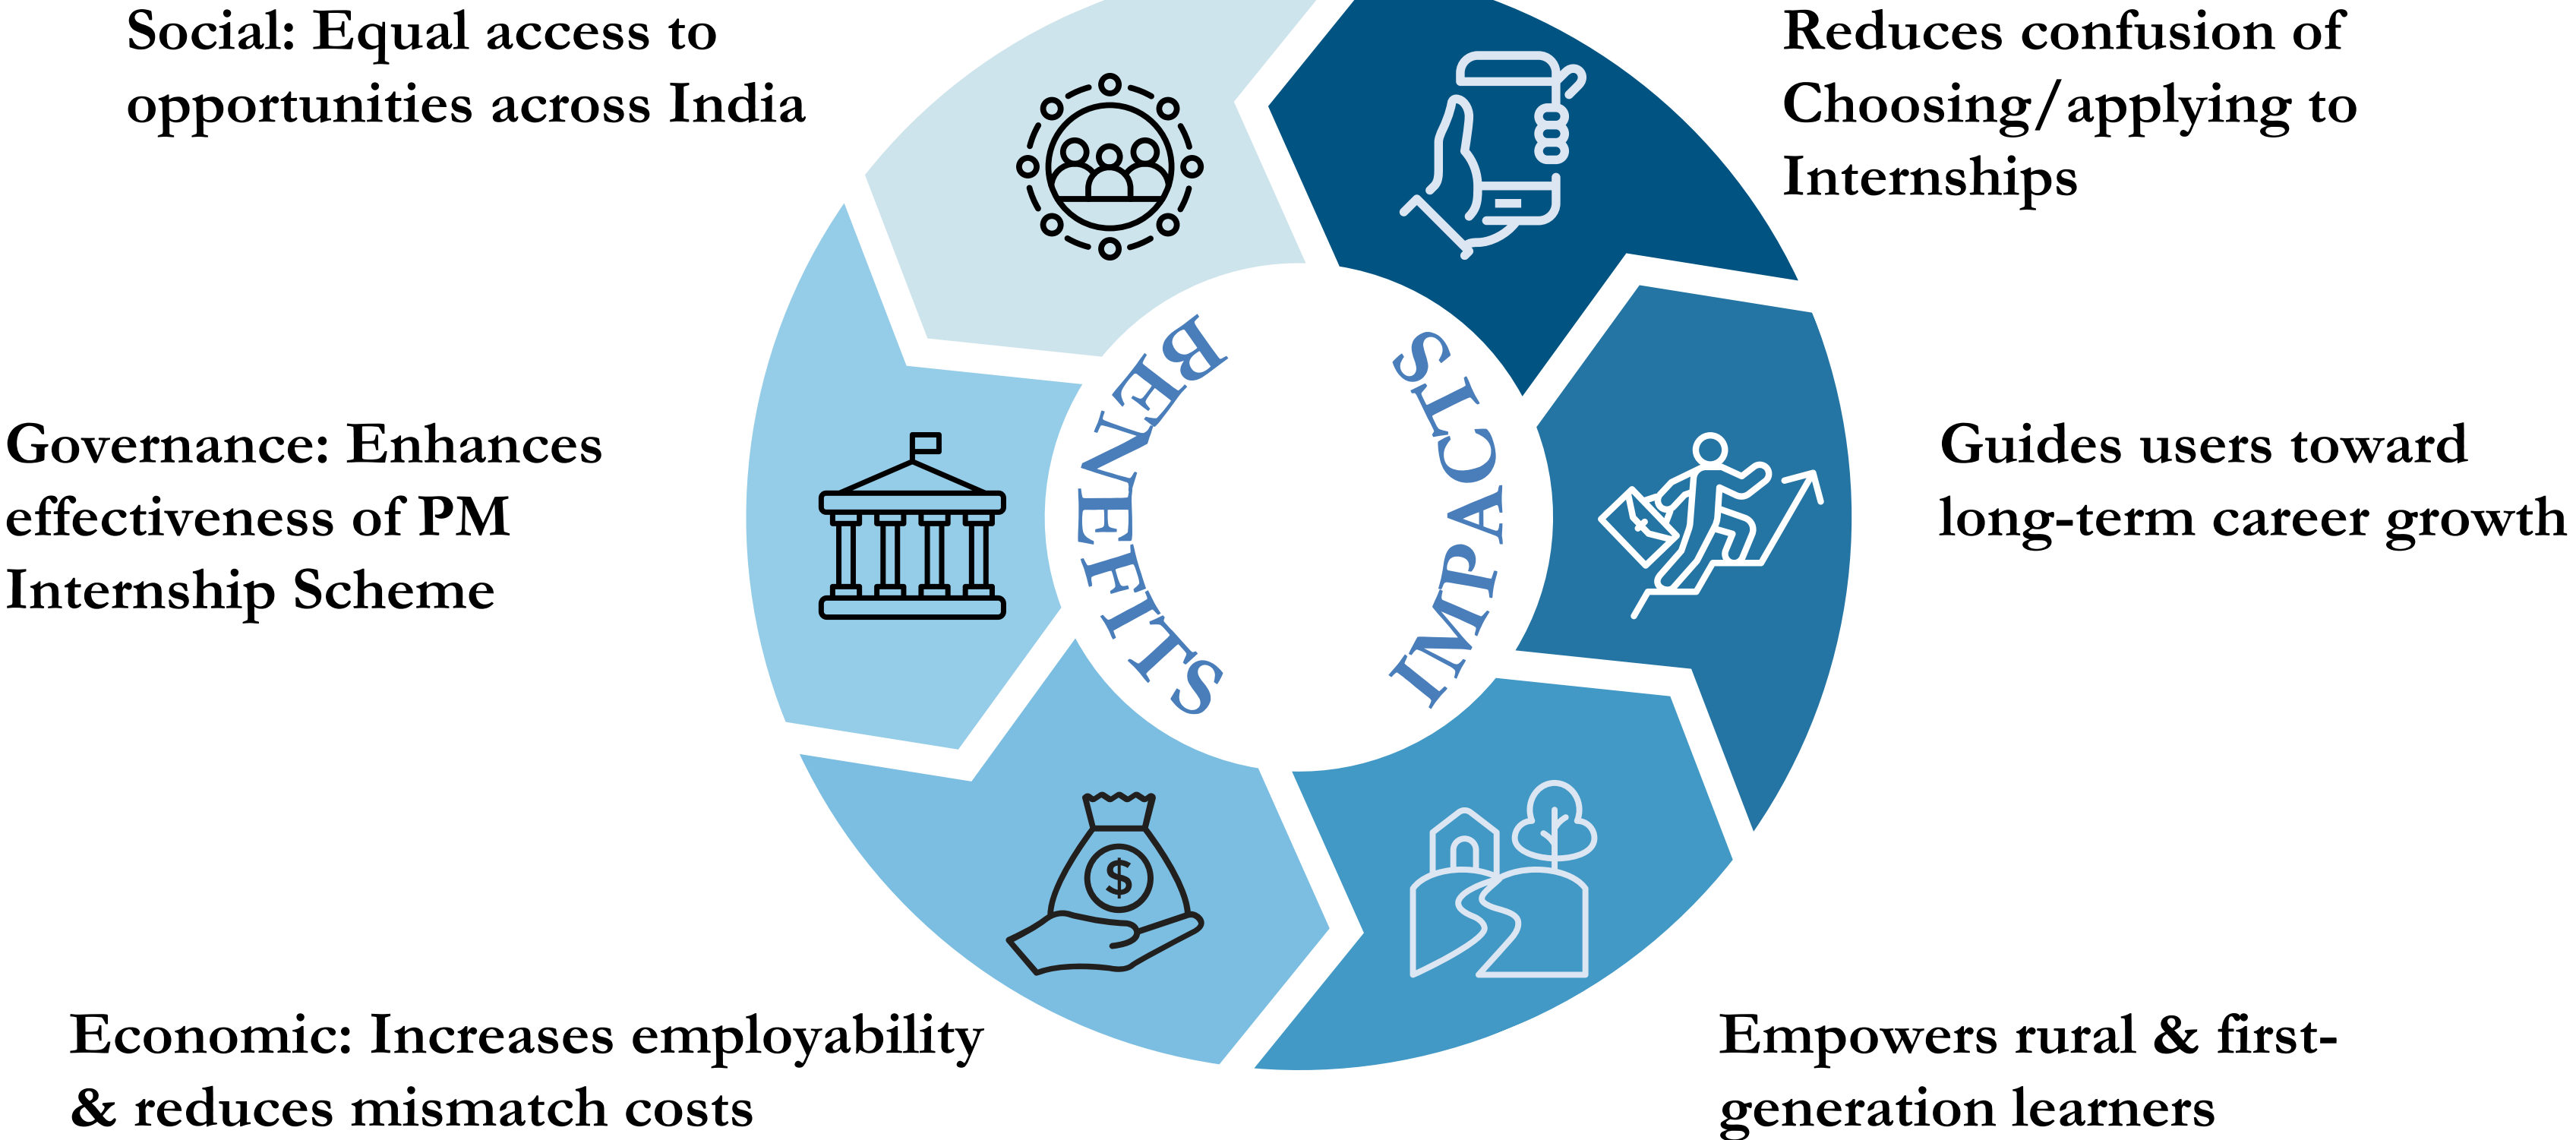

Challenges

- Handling low-bandwidth rural users
- Rural users may struggle with English UI
- User may leave profile incomplete

Solutions

- Mobile application with simple UI with offline supports
- Use react libraries for different language support
- Forms with more dropdowns and auto data caching

IMPACT AND BENEFITS

- PM Internship Scheme – <https://www.myscheme.gov.in/schemes/pmis>
- Data.gov.in (Internship related datasets) – <https://data.gov.in>
- NPTEL – <https://nptel.ac.in>
- Coursera (Free Courses) – <https://coursera.org>
- Research papers on Career Path Recommendation (IEEE, Springer)
